Subject: Cost Estimate for Schedule Improvement
on Four (4) "A" Follow-On Systems

Dear Art:

25X1A

Enclosed please find Cost Breakdown in the amount of [REDACTED] representative of the cost for accomplishing the lens barrel transfer on camera S/N 21.

This estimate covers the additional cost over and above the scope contracted for to allow for Perkin-Elmer to machine a Tenzalloy barrel and transfer the lens elements of a GFP 3-inch F25 Geocon lens. The labor hours, as indicated, were incurred by FSDS personnel on a trip to Wright Field to obtain this lens, and the subcontract dollars shown are P & E's cost to accomplish the barrel transfer.

Upon your review and approval of this estimate, I would appreciate your concurrence as to crediting this amount to the existing debit on this contract, as negotiated with you early in December, in the amount of [REDACTED]

25X1A

Thank you for your cooperation in this matter.

Very truly yours,

STATINTL
